

PREAMBLE FOR THE JOHNNY APPLESEED NET

Check Frequency 28.450 MHZ to see if it is in use.

QST QST QST De Your Call

Welcome to the Johnny Appleseed Net. This Net meets each Friday evening at 9pm local time on 28.450 MHZ.

Net Control tonight is your call and my name is _____.

There is a very nice certificate awarded to any amateur worldwide who make contacts with at least five Coshocton County Ohio amateurs or Coshocton County Amateur Radio Association members exchanging calls and signal report. This QSO is verified by Net Control.

The certificate will be sent free of charge after your five contacts are completed. More than one contact with the same eligible amateur can count provided there is a period of one week between contacts.

Take Check-ins.

Ask for additional checkins throughout the net.

See if anyone needs a Johnny Appleseed Award, if so, work that station.

Find out if their address is good in the FCC database, etc. or write it down. If they make five good contacts, send info to the CCARA Secretary. CCARA membership list is good to have as net control.

End the net....Thank all stations and turn the frequency back to normal amateur radio use.

Coshocton County Amateur Radio Association 2003/04
